

CAT 2026 PREPARATION

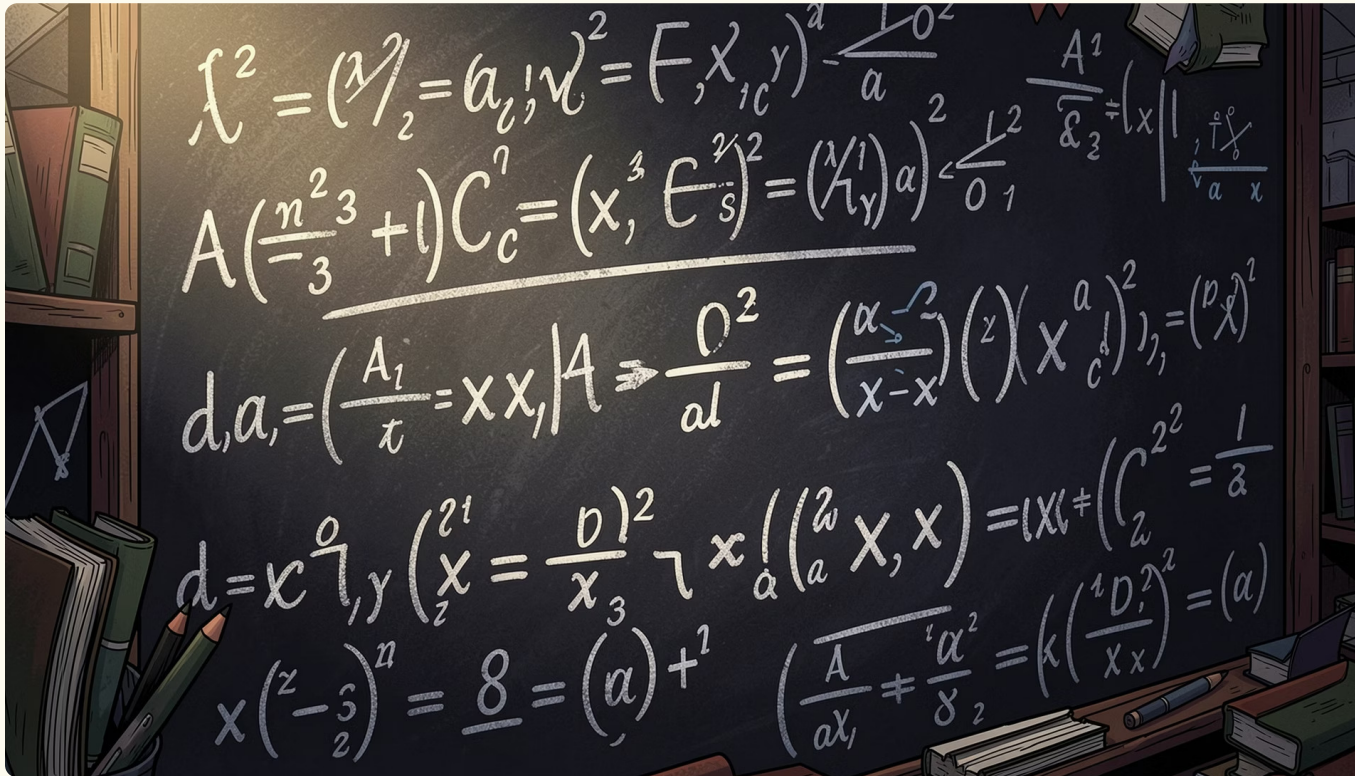

Master Algebra for CAT Success

Your comprehensive online mock test platform — designed to transform algebra from a fear into your fiercest competitive advantage.

Made with GAMMA

The Hidden Engine of CAT 2026

35–40% of Quant Section

Algebra dominates the Quantitative Aptitude section — more than any other single topic. Master it, and you control the exam.

80% of Marks Are Attainable

While others shy away, you can secure the majority of marks by mastering core algebraic structures and reasoning patterns.

EXAM BLUEPRINT

High-Stakes Algebra Landscape

12–14 Questions

Expect a balanced mix of foundational linear equations and advanced polynomial analysis across the section.

Logical Reasoning Over Rote Formulas

Success demands the ability to solve systems of equations and analyze function behavior under strict time pressure.

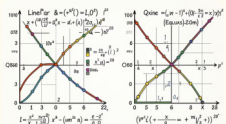

Precision Under Pressure

Every second counts. Structured practice builds the speed and accuracy that separates top scorers from the rest.

CORE PILLARS

Targeted Mastery: The Four Pillars

Linear & Quadratic Equations

The backbone of your score — foundational yet frequently tested at advanced levels.

Handwritten mathematical derivations for inequalities and modulus. It shows the derivation of the inequality $\frac{1}{x} + \frac{1}{y} \geq \frac{4}{x+y}$ and the modulus inequality $|x - y| \leq |x| + |y|$.

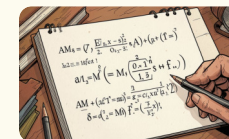

Inequalities & Modulus

High-impact concepts that appear in the most challenging questions — mastery here is a game-changer.

Progressions & Logarithms

Pattern-based shortcuts that save critical minutes during the exam.

AM-GM & Maxima/Minima

The essential toolkit for unlocking expert-level problems that separate 99th percentile scorers.

Your Path to the 99th Percentile

Every algebra question you master is a direct step toward securing your dream MBA seat. The platform gives you the tools — your commitment delivers the results.

- 📌 **Start today.** Over 300 curated questions, video solutions, and a structured learning path are waiting for you. Your 99th percentile is closer than you think.
